# Antitrust Policy

All project meetings are subject to the [Linux Foundation Antitrust Policy](#). The following topics must not be discussed:

- Price-sensitive information
- Actual or projected changes in production, output, capacity or inventories
- Matters relating to bids, prospective bids, or bid policies
- Matters relating to actual or potential individual suppliers that might influence the business conduct of firms toward such suppliers
- Matters relating to actual or potential customers that might have the effect of influencing the business conduct of firms toward such customers
- Current or projected costs of procurement, development or manufacture of any product
- Market shares for any product or for all products
- Confidential or otherwise sensitive business plans or strategy

If you have questions, please contact [legal@finos.org](mailto:legal@finos.org).

# Standards Project IP Rules

All contributions are subject to the [Community Specification License](#). This includes the following:

- By contributing to a draft specification, participants agrees to license any patent claims that apply to that draft specification.
- When the project issues an approved specification, all contributors agree to license any claims that apply to that approved specification.
- These licenses extend to any claims applicable to the specification as a whole, not merely to the individual participant's contributions.
- Participants may decline to license specified claims by issuing an exclusion notice (under Section 3 of the CSL) within 45 days of (1) their contribution to a draft specification, or (2) the approval of a specification by the project, as applicable.

If you have questions, please contact [legal@finos.org](mailto:legal@finos.org).
